Subject: Marquardt Ave. Waterline Replacement Project

Dear Residents:

The City of North Canton will begin infrastructure improvements on Marquardt Avenue the week of June 9, 2014. Improvements consist of water main replacement and service line work, new curb and repaving the street. This work is being done at no out of pocket cost to you. Funds are from the City's General Fund and Water Fund. Local access and access to driveways will be maintained whenever possible as works progresses; however there may be times when access to driveways and the street are not available.

The City will be replacing the water service lines from the water main to the shut-off valve during this construction. *However*, the service line from the shut-off valve to the service structure is **the responsibility of the property owner** and it has been our experience these service lines may be old and in need of replacement. Should we discover your service is deteriorated; we will inform you of this condition and suggest you have it replaced.

Note: Sprinkler systems and other private items within the public right of way may be disturbed due to the construction activity. Although the City's contractor will exercise care not to affect these items, it is **not** the City's responsibility to replace such items. If necessary, the removal and replacement of U.S. Postal mail boxes **will be handled by the project contractor** and/or the City.

Restoration and re-seeding of lawns, right-of-way and devil's strip will be completed as soon as possible post-construction. Once these areas have been seeded and restored, it will be necessary for the property owner/resident/occupant to properly water these areas to promote growth and maintenance of grass and deter the development of weeds.

Please contact **Ed Naiman** in the Engineering Department at **499-3465** if you have questions. We appreciate your patience in helping to accomplish this improvement in your area.
