

WEST MAPLE STREET WIDENING

The City intends to widen and repave West Maple Street between Ream Avenue and Main Street during the second half of 2017. Work includes extension of the existing left turn lane for east bound approach to the Main Street intersection, as well as the creation of a west bound left turn lane to accommodate south turning movement onto Alley Number 57. Decorative elements including street lighting and brick accents will be incorporated into the project. The City Engineer's office would welcome any public comments.

Your comments/input can be sent to:

lteis@northcantonohio.gov and will be read by the City Engineer. Thank you.
